

TEPA 550 personal rescue equipment

TEPA 550 Personal rescue equipment is used together with the 501.2 mast winch to rescue an ill or injured person from a mast or another height.

The product is designed and manufactured according to the standards EN341 + A1 1996.

'Personal protective equipment against falls from a height and descender devices'

Qualification approval is made based on descender device category EN 341-C.

Fimtekno has tested the product and **CERTIFICATION No 01196 REFERENCE No 0121** is admitted on 26.02.2002.

In a work situation, two installers in a group of three persons are able to bring the injured person to the ground quickly and safely with the help of these device.
